Total Marks: 40

NOTE: All the questions are based on the lecture named “Interview Strategies and Skills”. Please answer all the questions according to what has been taught in the lecture. Generic answers will not be accepted.

Q.1: In an interview, you will most probably be asked the following questions: (Marks: 10)

1. What do you know about our company/ organization/ institute?

Answer :

Zameen.com is the first and largest property portal in Pakistan and is among the top five property portals in the world. It was founded in 2006 and has since revolutionised the real estate industry of Pakistan by connecting buyers and sellers online in a highly convenient way, making it a household name among Pakistanis around the world. Zameen.com was the brainchild of two British-Pakistani entrepreneur brothers, Zeeshan Ali Khan and Imran Ali Khan. Their mission was to make Pakistani real estate accessible and convenient for everyone. Together, they proceeded to lead Zameen.com from a small start-up to the premier real estate entity of Pakistan.

2. Why did you decide to join us?

Answer:

Because I am a Data Engineer I love to play with real-Time data integration which I can get only at zameen.com organization where all the people whose belong to Pakistan can put their interest on your organization I can play with that Data and get Beneficial yield for your company.

🕒 5 days ago 🏢 Full-time

You will be participating in exciting projects covering the end-to-end data lifecycle – from raw data integrations with primary and third-party systems, through advanced data modeling, to state-of-the-art data visualization and development of innovative data products.

You will have the opportunity to learn how to build and work with both batch and real-time data processing pipelines. You will work in a modern cloud-based data warehousing environment alongside a team of diverse, intense, and interesting co-workers. You will liaise with other departments – such as product & tech, the core business verticals, trust & safety, finance, and others – to enable them to be successful.

Your responsibilities

- Design, implement and support data warehousing;
- Raw data integrations with primary and third-party systems
- Data warehouse modeling for operational & application data layers
- Development in Amazon Redshift cluster

Your task is to look for any vacancy related to your field online. Get information about that company/ organization/ institute and then answer the question stated above. Take a screenshot of that advertisement and share it here with your answer.

Q.2: If you have already shared your skills in your Resume/C.V then why is it still necessary to be called for an interview? (Marks: 05)

Answer:

Skills are only not one thing for able to doing jobs. Your Attitude, responsibility, honesty, personality, body-language also matter . to test these abilities, an interview is necessary.

Q.3: Briefly discuss the STAR method. (Marks: 05)

Answer: STAR method stands for situation task action Result. STAR method that works whenever tasked with answering behavioural interview questions.

Situation: Explain the situation that you were in. This should be a short description, it could be: 'during my degree' or 'whilst working in a bar'.

Task: You need to briefly explain what you did and how you met the criteria for success. If you were working in a group, explain the overall group task but focus on your role.

Action:

This is the most substantial part (around 50-70%) of any example and you need to include:

What you did.

Why you did it.

How you did it.

Which skills you used.

Result: There is little point in explaining the situation, task and action if the employer or course provider is left wondering whether what you did made any difference.

Q.4: Selected any question from the list of Behavioral Interview Questions provided in the lecture and answer it. Do not forget to mention the question you have selected. (Marks: 05)

Question: Tell me about your self?

I'm Muhammad Iftikhar Graduated from the Fast university as Data Engineer. I did lots of projects about Data integration and also work at Open Source Contribution project and am highly passionate to learn new technologies that are all.

Q.5: An interview of a person named Owen has been shared in the lecture as an activity. Before the interview starts, three questions have been shared to be answered by the students. Answer those questions after carefully listening to the interview. Do not forget to mention the questions. (Marks: 15)

What Does Owen say about his university approach to learning?

Owen said he likes to think Something why is working and if they are not working why they are not working and think to come solve the problem. he is good at problem-solving.

what are two qualities that owen mentions?

They are two qualities owen mentioned. He is expert in Analyzing the Situation and solving problem .

Why do you think George is handling the technical aspects of the interview?

Because George Joo is Engineering manager for the printer division. That's why he is handling the technical aspects of the interview
